

E-COMMERCE SOFTWARE VENDOR DECISION-MAKING GUIDE

Today, every business wants to – and needs to – **invest in a web store** (or in web store improvements) to stay competitive. But the market is oversaturated with options when it comes to e-commerce software vendors, and it's tough to know **which solution is right for you**.

Use this guide to determine which solution best fits your business model and needs. First things first: here's an overview of your options.

ERP INTEGRATED

ERP integrated e-commerce software is built directly in the ERP, transforming the ERP into a single source of truth.

SHOPPING CART

Shopping cart software exists independently from the ERP and other backoffice systems and has its own table structure.

CONNECTORS

Connectors refer to a third-party application used to sync a web store with an ERP system.

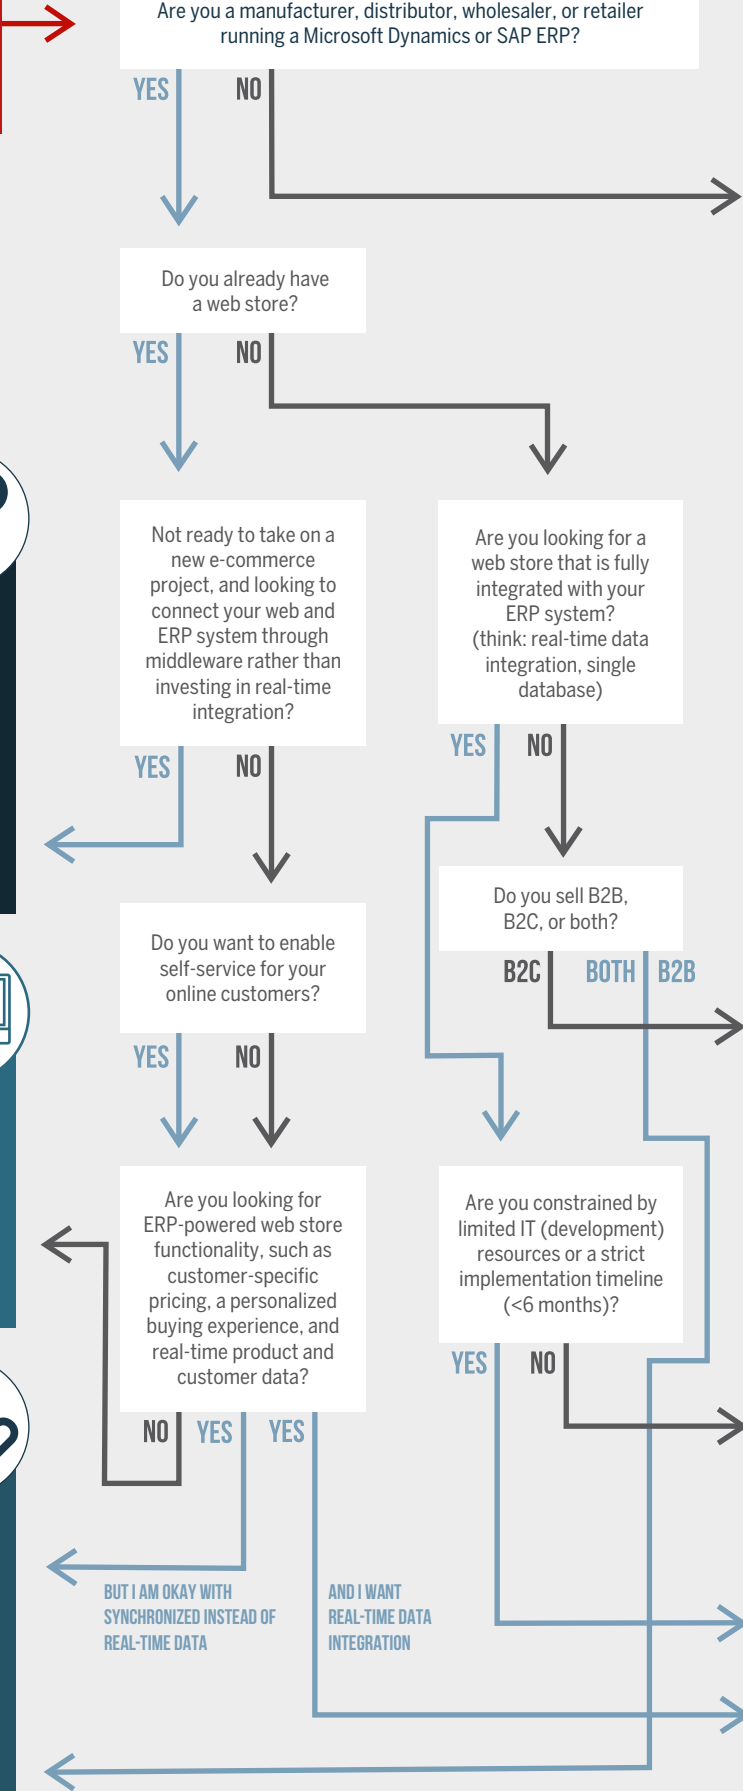

INTERFACED

Interfaced e-commerce options include a CMS and a connector to sync information to and from the ERP system.

Now that you have an overarching view of your choices, use our guide to help you select the best solution for your business:

START

SANA COMMERCE IS NOT A FIT FOR YOU

Based on your needs, you may want to consider alternatives, like connectors, shopping cart software (if ERP integration are not a concern), or an interfaced solution (if you do want to make your ERP a key part of your e-commerce strategy).

[Learn about your alternative options.](#)

CONSIDER A CONNECTOR

However, because you're already equipped with your ERP data, an e-commerce project may be less daunting than it seems. Plus, connectors do tend to be similar in cost to a dedicated e-commerce project.

STICK WITH YOUR CURRENT WEB STORE

Now may not be the right moment to take on a new e-commerce project, but consider investing in better e-commerce at a later time.

AN INTERFACING SOLUTION MAY WORK

Interfacing solutions, though, do force you to replicate your ERP data, which means that your web store data is not synced in real time, and that data maintenance and web store performance may be a challenge.

CONSIDER A SHOPPING CART SOLUTION

You may benefit from investing in a shopping cart solution, like Magento or Shopify. This type of software is heavily focused on B2C, which is less complex than B2B, but it also requires data replication and maintenance of multiple systems.

ERP INTEGRATION IS FOR YOU

Sana Commerce may be a good fit, but you may also want to consider some bigger integrated solutions like SAP Commerce Cloud (formerly known as SAP Hybris). Need help choosing?
